

A Street Through Time

This is the tragic story of the Titanic, the biggest and most luxurious ocean liner the world had ever seen, which sank on her maiden voyage in April 1912. Beautiful, double-page illustrations with amazing cross-sections and cutaway details explain the construction and mechanical details of this gigantic ship and reveal life onboard for passengers and crew. Each new illustration reveals different aspects of life in the early 20th century, and the text highlights hidden details for you to spot. As you follow the pictorial story of this world-famous liner, you will discover how she was built and equipped, what kind of passengers and crew she carried, and what facilities she offered onboard. You will also find out how she struck an iceberg and met with disaster, why she sank so quickly, how many people were saved, and how many lives were lost. You can compare the differences between the Titanic's passengers—from the first-class millionaires to the third-class emigrants—and find out how they dressed, where they ate and slept, and what they did to amuse themselves during the voyage. You can also take a closer look at some of the passengers and crew, and follow their different fates from the exciting start of the voyage to its tragic end.

This book is a photographic essay on the history of Pico Boulevard in Los Angeles, highlighting continuity and changes from the late nineteenth century into the twenty-first through the prism of the street's architectural legacy. Pico Boulevard is one of the major east-west boulevards running through Los Angeles, and traverses industrial, urban, and commercial areas serving among the most culturally, demographically, and economically diverse neighborhoods. It is an example of the many Main Street-style boulevards in the city, mixing mom-and-pop business establishments that cater to local and immigrant communities with large commercial enterprises. As the urban fabric and transportation infrastructure in Los Angeles undergo major changes, so is Pico Boulevard, which is becoming prime frontage for new commercial, multi-family and mixed-use redevelopment.
