As of 2012, only 43 men have held the office of the President of the United States. Some have been sanctified and some reviled. This historical work addresses the careers of the first ten presidents, men who made vital contributions not only to the office of the presidency, but to the course of the fledgling nation. From Washington through Tyler, every term is recounted in detail and each presidential profile provides as many as a hundred quotations (with full source notes) by the president, his friends, family, historians, and others. Each profile ends with an extensive bibliography of books about the president, his principles and policies, and also provides suggestion for further reading. Rigorously nonpartisan in approach, this detail-rich text describes the early years of what may well be one of the most demanding jobs in the world.

On May 25, 2012, President Obama announced that the United States would spend the next thirteen years – through November 11, 2025 – commemorating the 50th Anniversary of the Vietnam War, and the American soldiers, "more than 58,000 patriots," who died in Vietnam. The fact that at least 2.1 million Vietnamese – soldiers, parents, grandparents, children – also died in that war will be largely unknown and entirely uncommemorated. And U.S. history barely stops to record the millions of Vietnamese who lived on after being displaced, tortured, maimed, raped, or born with birth defects, the result of devastating chemicals wreaked on the land by the U.S. military. The reason for this appalling disconnect of consciousness lies in an unremitting public relations campaign waged by top American politicians, military leaders, business people, and scholars who have spent the last sixty years justifying the U.S. presence in Vietnam. It is a campaign of patriotic conceit superbly chronicled by John Marciano in *The American War in Vietnam: Crime or Commemoration?*. A devastating follow-up to Marciano's 1979 classic *Teaching the Vietnam War* (written with William L. Griffen), Marciano's book seeks not to commemorate the Vietnam War, but to stop the ongoing U.S. war on actual history. Marciano reveals the grandiose flag-waving that stems from the "Noble Cause principle," the notion that America is "chosen by God" to bring democracy to the world. Marciano writes of the Noble Cause being invoked unsparingly by presidents – from Jimmy Carter, in his observation that, regarding Vietnam, "the destruction was mutual," to Barack Obama, who continues the flow of romantic media propaganda: "The United States of America ... will remain the greatest force for freedom the world has ever known." The result is critical writing and teaching at its best. This book will find a home in classrooms where teachers seek to do more than repeat the trite glorifications of U.S. empire. It will provide students everywhere with insights that can prepare them to change the world.

This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information

on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

Criticizes the way history is presented in current textbooks, and suggests a more accurate approach to teaching American history.

"We've needed a book like *Many Mirrors* for a long time. In the veritable explosion of new scholarship on the human body, this book stands out in its focus on empirical research. *Many Mirrors* will move . . . the *Anthropology of the Body* a giant step forward."--C. H. Browner, University of California at Los Angeles In every society, people define and change their physical appearance in response to their relationships to others: we add clothes and masks, remove them, build up our muscles, perforate our flesh, cut parts away, comb our hair, and modify our diets. In rural Jamaica, fat women are considered desirable; in American suburbia, teenage girls are obsessed with thinness. Bedouin women use tattoos to express their secret longings; Asian American women undergo cosmetic surgery to conform to internalized western standards of beauty. Even with mirrors to see ourselves, we rely on the reactions of others to learn how we look and who we are. Where contemporary Western culture sees the body as a concrete thing with an objective, observable reality, separate from the self, many other societies regard the person as an integrated whole that includes the mind, the body, and the spirit. Through the contributors' studies of individual cultures and through the editor's unifying "body image system", this volume gives us a new conceptual framework for understanding how women and men in any society perceive, describe, and alter their bodies.

Primary source documents, often accessible only in musty archives, are the raw material from which historians craft their stories. The American Spirit is a virtual archive where students can touch the evidence deposited by the living, breathing, often conflicted and frequently contentious men and women who lived and shaped America's past.

This collection of new essays explores the role played by women practitioners in the arts during the period often referred to as the Belle Epoque, a turn of the century period in which the modern media (audio and film recording, broadcasting, etc.) began to become a reality. Exploring the careers and creative lives of both the famous (Sarah Bernhardt) and the less so (Pauline Townsend) across a remarkable range of artistic activity from composition through oratory to fine art and film directing, these essays attempt to reveal, in some cases for the first time, women's true impact on the arts at the turn of the 19th century.

This book focuses on tools and techniques for building regression models using real-world data and assessing their validity. A key theme throughout the book is that it makes sense to base inferences or conclusions only on valid models. Plots are shown to be an important tool for both building regression models and assessing their validity. We shall see that deciding what to plot and how each plot should be interpreted will be a major challenge. In order to overcome this challenge we shall need to understand the mathematical properties of the fitted regression models and associated diagnostic procedures. As such this will be an area of focus throughout the book. In particular, we shall carefully study the properties of residuals in order to understand when patterns in residual plots provide direct information about model misspecification and when they do not. The

regression output and plots that appear throughout the book have been generated using R. The output from R that appears in this book has been edited in minor ways. On the book web site you will find the R code used in each example in the text.

Timed with the centennial of the Panama-Pacific International Exposition (PPIE) of 1915, *Jewel City* presents a large and representative selection of artworks from the fair, emphasizing the variety of paintings, sculptures, photographs, and prints that greeted attendees. It is unique in its focus on the works of art that were scattered among the venues of the exposition—the most comprehensive art exhibition ever shown on the West Coast. Notably, the PPIE included the first American presentations of Italian Futurism, Austrian Expressionism, and Hungarian avant-garde painting, and there were also major displays of paintings by prominent Americans, especially those working in the Impressionist style. This lavishly illustrated catalogue features works by masters such as Winslow Homer, John Singer Sargent, Claude Monet, Paul Cézanne, Robert Henri, Edward Weston, Imogen Cunningham, Edvard Munch, Oskar Kokoschka, Umberto Boccioni, and many more. The volume also explores the PPIE's distinctive murals program, developments in the art of printmaking, and the legacy of the French Pavilion, which hosted an abundance of works by Auguste Rodin and inspired the founding and architecture of the Legion of Honor museum in San Francisco. A rich and fascinating study of a critical moment in American and European art history, *Jewel City* is indispensable for understanding both the United States' and California's role in the reception of modernism as well as the region's historical place on the international art stage. Published in association with the Fine Arts Museums of San Francisco. Exhibition dates: de Young Museum, San Francisco: October 17, 2015–January 10, 2016

USAs historie indtil 1996

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

With the economy struggling, there has been much discussion about the effects of deindustrialization on American manufacturing. While the steel and auto industries have taken up most of the spotlight, the textile and apparel industries have been profoundly affected. In *Empty Mills*, Timothy Minchin provides the first book length study of how both industries have suffered since WWII and the unwavering efforts of industry supporters to prevent that decline. In 1985, the textile industry accounted for one in eight manufacturing jobs, and unlike the steel and auto industries, more than fifty percent of the workforce was women or minorities. In the last four decades over two million jobs have been lost in the textile and apparel industries alone as more and more of the manufacturing moves overseas. Impeccably well researched, providing information on both the history and current trends, *Empty Mills* will be of importance to anyone interested in economics, labor, the social historical, as well as the economic significance of the decline of one of America's biggest industries.

THE CLASSIC NATIONAL BESTSELLER "A wonderful, splendid book—a book that should be read by every American, student or otherwise, who wants to understand his country, its true history, and its hope for the future." —Howard Fast Historian Howard Zinn's *A People's History of the United States* chronicles American history from the bottom up, throwing out the official narrative taught in schools—with its emphasis on great men in high places—to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, it is the only volume to tell America's story from the point of view of—and in the words of—America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As Zinn shows, many of our country's greatest battles—the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality—were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, *A People's History of the United States* features insightful analysis of the most important events in our history. This edition also includes an introduction by Anthony Arnove, who wrote, directed, and produced *The People Speak* with Zinn and who coauthored, with Zinn, *Voices of a People's History of the United States*.

In honor of the four hundredth anniversary of Jamestown, a collection of writings taken from the journals of Captain John Smith limns a detailed portrait of the founding of the Jamestown colony, life in colonial Virginia, his efforts to establish trade relations with local Native Americans, and the real-life facts behind the legend of his relationship with Pocahontas. Original. 10,000 first printing.

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

President Donald J. Trump lays out his professional and personal worldview in this classic work—a firsthand account of the rise of America's foremost deal-maker. "I like thinking big. I always have. To me it's very simple: If you're going to be thinking anyway, you might as well think big."—Donald J. Trump Here is Trump in action—how he runs his organization and how he runs his life—as he meets the people he needs to meet, chats with family and friends, clashes with enemies, and challenges conventional thinking. But

even a maverick plays by rules, and Trump has formulated time-tested guidelines for success. He isolates the common elements in his greatest accomplishments; he shatters myths; he names names, spells out the zeros, and fully reveals the deal-maker's art. And throughout, Trump talks—really talks—about how he does it. Trump: The Art of the Deal is an unguarded look at the mind of a brilliant entrepreneur—the ultimate read for anyone interested in the man behind the spotlight. Praise for Trump: The Art of the Deal “Trump makes one believe for a moment in the American dream again.”—The New York Times “Donald Trump is a deal maker. He is a deal maker the way lions are carnivores and water is wet.”—Chicago Tribune “Fascinating . . . wholly absorbing . . . conveys Trump's larger-than-life demeanor so vibrantly that the reader's attention is instantly and fully claimed.”—Boston Herald “A chatty, generous, chutzpa-filled autobiography.”—New York Post

Kaplan's, 5-Steps, Crash Course and other review books are great resources for that last month before the exam, but Tamm's Textbook Tools student activity books are meant to be an accompaniment all year long. This AP\* U.S. History companion is filled with vocab and assignments that follow the Kennedy/Cohen sixteenth edition for all 41 chapters. They can be used as regular weekly assignments or reviews. They can be used on short notice if there is a sub, or be assigned as regular homework. All you need is the textbook. Teachers can copy at will, or the book can be used as a student consumable. As publishers began putting their content online, a niche for traditional classwork was opened, a void filled by this series. And whether the textbook itself is written in ink or electrons, many students still find it more valuable to write and keep notes for themselves on paper, and portfolios still matter. The activities in this workbook challenge students to apply the concepts, give examples, and diagram every chapter. Find TTT on FB.

You may not think that a history book could make you laugh, but THE AMERICAN PAGEANT just might. It's known for being one of the most popular, effective and entertaining texts on American history. Colorful anecdotes, first-person quotations and the authors' trademark wit bring history to life. Learning aids make the book as accessible as it is enjoyable: part openers and chapter-ending chronologies provide a context for the major periods in American history, while primary sources and introductions to key historical figures give you a front row seat to the nation's past. "I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.
