A glimpse into the "quintessentially Greenwich" homes that are stately and elegant yet designed for the comforts of family life. Greenwich is one of the most desirable communities in the United States, with houses that epitomize the suburban tradition. With their handsome facades and elegant interiors, these homes provide inspiration to decorators and homeowners nationwide. More than almost any other community, Greenwich signifies a classic look, a way of living, and a state of mind. Cindy Rinfret's successful Classic Greenwich Style was the first book to celebrate the style of this classically American town and bring its renowned look to a nationwide audience. Now, the beloved designer returns with an all-new selection of interiors that will appeal to a new generation of homeowners seeking elegant yet comfortable design. Specially commissioned photographs showcase the designer's signature "young traditional" style: a warm blend of color, contemporary materials with traditional shapes, antiques with transitional pieces, English-style furnishings with family heirlooms, and spaces for entertaining and family life. In her own words, Rinfret offers an intimate look into these stunning interiors—including Rinfret's own classically styled house, Laurel Hill—and shows how people who covet the look and style of Greenwich can create it for themselves.

In A Blissful Nest, celebrated interior designer Rebekah Dempsey offers fresh and attainable design ideas to show you how to discover your interior style and create a home that truly reflects your personality and the way you live.

This book examines over 30 bathroom designs from around the world, each one designed by a notable architect and created especially for a specific residence. For each bathroom there is an image of the whole house (placing it in context and providing a flavor of the general design style), images of the bathroom, and a floor plan showing its relation to the other spaces. The pages that follow are entirely devoted to detailed drawings showing the arrangement and construction of the bathroom, in particular sections, elevations, and construction details of all the fitted units and joinery. These drawings are all made to a consistent style and to a set number of scales for easy comparison. Dimensions are also included with the drawings as well as details of fitted units (baths, showers, basins, etc.). The credits for the projects include contact details of suppliers so that the exact materials and fixtures can be sourced. The projects are arranged into chapters by type of dominant material: glass, steel and stone. The book will be invaluable for all practicing architects as well as those considering commissioning a high-quality bathroom for their own house.

A former Senior Partner and Global Managing Director at the legendary design firm IDEO shows how to design conversations and meetings that are creative and impactful. Conversations are one of the most fundamental means of communicating we have as humans. At their best, conversations are unconstrained, authentic and open—two or more people sharing thoughts and ideas in a way that bridges our individual experiences, achieves a common goal. At their worst, they foster misunderstanding, frustration and obscure our real intentions. How often do you walk away from a conversation feeling really heard? That it moved the people in it forward in some important way? You're not alone. In his practice as a designer, Fred Dust began to approach conversations differently. After years of trying to broker communication between colleagues and clients, he came to believe there had to be a way to design the art of conversation itself with intention and purpose, but still artful and playful. Making Conversation codifies what he learned and outlines the four elements essential to successful exchanges: Commitment, Creative Listening, Clarity, and Context. Taken together, these four elements form a set of resources anyone can use to be more deliberate and purposeful in making conversations work.
