Norton Commando

MG was a home-grown concept that became an international success, bringing the small market town of Abingdon onto the global map. MG: Made in Abingdon recounts the inside story of the famous factory, recognising that the most important aspect of MG's success was its team - the tea-boys and girls, the shop floor workers, the engineers and racers, the apprentices and management. From memories of the production line to recollections of racing incidents, the untold story of MG from the men and women who worked in the Abingdon factory is revealed for the first time in a book that is both nostalgic and historically important.

The Commando was the main bike in Norton's range from 1968, and was produced until the demise of Norton Villers Triumph in 1977. The bike featured the unique 'Isolastic' system that rubber-mounted the engine and protected the rider from the twin-cylinder's vibrations. The model range provided the rider with a choice of touring and sporting models, as well as offering special police machines and off-the-shelf production racers. Commandos feature strongly in today's classic scene, and offer excellent performance and spares availability, as well as a vast range of improvements and updated components. This book looks at the history and development of the Commando, gives the specifications and outlines the model changes, and also offers the riding experiences of past and present owners. In addition there is a blow-by-blow account of the author's restoration of a 1971 750cc model that had been re-imported into the UK from America needing a complete rebuild.
