Evolve Apply

"This innovative interactive text explains 58 of the most common nursing concepts - including six all new concepts - that span the areas of patient physiology, patient behavior, and the professional nursing environment. Featured exemplars for each concept are also discussed to help you more easily understand the concepts and apply them to the clinical setting. In addition to more concepts and featured exemplar sections, this new second edition also boasts a more intuitive organization and review questions for both RN and LPN/LVN programs"--Publisher.

Clinical Decision Making: Case Studies in Medical-Surgical Nursing

Perfect for: • Bachelor of Nursing Students. • Diploma of Nursing students. Apply theory to practice with the Clinical Cases textbook series! Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is part of the Clinical Cases textbook series, which offers nursing students a collection of scenarios that are common in a variety of practical settings. Some of the topics covered in Medical-Surgical Nursing Case Studies include: Cardiovascular, Gastrointestinal, Musculoskeletal and Respiratory in relation to medical-

surgical nursing. The Medical-Surgical Nursing Case Studies textbook is complete with multiple choice questions throughout the chapters so you can revise and test your knowledge as you progress through the text. Best of all, use Bothe's nursing textbook alongside Lewis' Medical-Surgical Nursing, 3rd Edition by Diane Brown and Helen Edwards to really excel at your Diploma and Bachelor of Nursing courses. Benefit from the logical structure of this nursing textbook. Medical-Surgical Nursing Case Studies features a clear introduction that explores an existing condition and outlines its symptoms. Further details are then provided to help you form a more complete context, including: patient's conditions, tests, medications and other considerations. Each case study within this nursing textbook provides a thorough conclusion that examines patient outcomes and the case's key points. If you enjoy learning from real life cases, the Clinical Cases textbook series is the perfect educational suite to support your nursing education. Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. Browse other titles in this series to enhance your knowledge of core nursing skills and theories. Other titles in this series:

- Clinical Cases: Fundamentals of Nursing Case Studies by Natashia Scully and Damian Wilson
- Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov

Other Formats This book is also available as an App via the Apple App Store (<https://itunes.apple.com/au/app/clinical-cases-medical-surgical/id666477607?mt=8>)

- Easy-to-understand, logical layout.
- 22 case studies covering the body

systems. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

NurseThink for Students

An all-inclusive guide to fundamentals and medical-surgical nursing for the LPN/LVN, Foundations and Adult Health Nursing, 7th Edition covers the skills you need for clinical practice, from anatomy and physiology to nursing interventions and maternity, neonatal, pediatric, geriatric, mental health, and community health care. Guidelines for patient care are presented within the framework of the five-step nursing process; Nursing Care Plans are described within a case-study format to help you develop skills in clinical decision-making. Written by Kim Cooper and Kelly Gosnell, this text includes all of the content from their Foundations of Nursing and Adult Health Nursing books, including review questions to help you prepare for the NCLEX-PN® examination! Full-color, step-by-step instructions for over 100 skills show nursing techniques and procedures along with rationales for each. The 5-step Nursing Process connects specific disorders to patient care - with a summary at the end of each chapter. Nursing Care Plans emphasize patient goals and outcomes within a case-study format, and promotes clinical decision-making with critical thinking questions at the end of each care plan. Clear coverage of essential A&P is provided by an Introduction to Anatomy and

Physiology chapter along with an overview of A&P in all body systems chapters. Student-friendly features enhance the learning of nursing skills with summary boxes for Patient Teaching, Health Promotion Considerations, Complementary and Alternative Therapy, Cultural Considerations, Older Adult Considerations, Home Care Considerations, Safety Alert, and Prioritization, Assignment, and Supervision. UNIQUE! Mathematics review in Dosage Calculation and Medication Administration chapter covers basic arithmetic skills prior to the discussion of medication administration. A focus on preparing for the NCLEX examination includes review questions and Get Ready for the NCLEX Examination! sections with key points organized by NCLEX Client Needs Categories. Evidence-Based Practice boxes provide synopses of nursing research articles and other scientific articles applicable to nursing, along with nursing implications for the LPN/LVN. Nursing Diagnosis boxes summarize nursing diagnoses for specific disorders along with the appropriate nursing interventions. UNIQUE! Delegation Considerations boxes provide parameters for delegation to nurse assistants, patient care technicians, and unlicensed assistive personnel. Medication Therapy tables provide quick access to actions, dosages, precautions, and nursing considerations for commonly used drugs. NEW! Reorganized chapters make it easier to follow and understand the material. NEW! Icons in page margins indicate videos, audios, and animations on the Evolve companion website that may be accessed for enhanced learning. UPDATED illustrations include photographs of common nursing skills.

Medical-Surgical Nursing

A collection of twenty-two unique and provocative real-life medical-surgical nursing case studies with rationales, this resource emphasizes holistic nursing care as it helps sharpen critical thinking skills and strengthens clinical competence.

Clinical Reasoning Cases in Nursing

Home health care is an important aspect of community health and a growing area of healthcare services. Clinical Case Studies in Home Health Care uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

Leadership and Management Tools for

the New Nurse

The “wrenching but inspiring” true story of a tragic medical mistake that turned a grieving mother into a national advocate (The Wall Street Journal). Sorrel King was a young mother of four when her eighteen-month-old daughter was badly burned by a faulty water heater in the family’s new home. Taken to the world-renowned Johns Hopkins Hospital, Josie made a remarkable recovery. But as she was preparing to leave, the hospital’s system of communication broke down and Josie was given a fatal shot of methadone, sending her into cardiac arrest. Within forty-eight hours, the King family went from planning a homecoming to planning a funeral. Dizzy with grief, falling into deep depression, and close to ending her marriage, Sorrel slowly pulled herself and her life back together. Accepting Hopkins’ settlement, she and her husband established the Josie King Foundation. They began to implement basic programs in hospitals emphasizing communication between patients, family, and medical staff—programs like Family-Activated Rapid Response Teams, which are now in place in hospitals around the country. Today Sorrel and the work of the foundation have had a tremendous impact on health-care providers, making medical care safer for all of us, and earning Sorrel a well-deserved reputation as one of the leading voices in patient safety. “I cried . . . I cheered” at this account of one woman’s unlikely path from full-time mom to nationally renowned patient advocate (Ann Hood). “Part indictment, part celebration, part catharsis” Josie’s Story is the startling, moving, and

inspirational chronicle of how a mother—and her unforgettable daughter—are transforming the face of American medicine (Richmond Times-Dispatch).

Josie's Story

This one-of-a-kind book delivers challenging, clinically relevant case-based learning tools regarding orthopedics and sports medicine for advanced practicenursing students and practitioners. Written by nurse practitioner/educators, it fills a gap in information and guidelines for treatment of this population in primary and acute care environments. Cases across the lifespan cover areas of orthopedics and sports medicine most likely to be encountered. Cases are described in depth to foster a comprehensive learning experience and to facilitate inductive and deductive critical reasoning. Each follows a template that encompasses the context for the case, chief patient complaints and history along with physical assessment findings, diagnostic evaluation, interventions, evaluation of care and outcome, and references for additional information. An accompanying teaching guide aids instructors in accelerating critical thinking. Key Features: Fills an identified gap in available literature Reflects both primary care and acute care across the lifespan Includes referral red flags and scope of practice for each case Formats cases for both inductive and deductive reasoning Offers focused instructor manual to facilitate meaningful learning

LPN to RN Transitions, 5th Edition, eases the return to academic life and helps licensed practical and vocational nurses effectively balance career, school, and personal pursuits on the journey to success in registered nursing programs. Case studies and interactive exercises guide readers in building a Personal Education Plan optimized for their unique skills, learning needs, and goals, giving aspiring registered nurses everything they need to confidently prepare for the rigors of RN programs.

Leadership and Management in Nursing Test Success

THINK Like a Nurse!

About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires

your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!

Case Studies in Nursing Fundamentals

Master the critical-thinking and test-taking skills you need to excel on the clinical judgment, prioritization, and delegation questions on the NCLEX-RN®. Over 1,000 questions in the text and online focus on clinical judgment, management decisions, setting priorities for client care, and delegating tasks.

Gerontology Nursing Case Studies, Second Edition

These online case studies provide an introduction to a real-world, patient situation - with critical-thinking questions to help students learn to manage complex patient conditions and make sound clinical judgements. These questions cover nursing care for clients with a wide range of physiological and psychosocial alterations, as well as related management, pharmacology, and nursing concepts.

Complete PN Online Case Studies The Complete PN Online Case Studies collection provides a comprehensive student remediation solution that encompasses review of content and test item practice from the major PN speciality content areas, including Fundamentals, Medical/Surgical Nursing, Maternity/Pediatrics, and Psychiatric/Mental Health Nursing.

Case Studies available in this collection:

- Fundamentals - Constipation - Breathing Patterns - Alteration in Nutrition - Fluid Balance - Loss, Grief, Death - Mobility - Pain - Sensory Function - Skin Integrity - Sleep Pattern - Urinary Patterns
- Psychiatric Nursing - Schizophrenia - Alzheimer's Disease - Alcoholism - Depression - Psychosis
- Medical/Surgical - Thyroid Disorders - Preoperative Care - Sickle Cell Disease - Osteoporosis - Ulcerative Colitis - Brain Attack - Cerebrovascular Accident - Chronic Renal Failure - Congestive Heart Failure - Coronary Artery Disease - Parkinson's Disease
- Obstetrics / Maternity Nursing - Postpartum Complications - The Healthy Newborn
- Pediatric Nursing - Cystic Fibrosis - Compound Fracture (Preschooler)

Cases in Hospital Medicine

Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be

considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Pain Management in Nursing Practice

"This will be very helpful to students studying leadership and management for the NCLEX. The questions are pertinent and well written, and they cover a wide range of topics. This review is a worthwhile resource for student preparation." Score: 96, 4 Stars. --Doody's Medical Reviews Based on an innovative, active learning paradigm, this course review for the Leadership and Management Nursing Skills NCLEX-RN features the use of unfolding case studies to thoroughly engage students while helping them to develop critical thinking and problem-solving skills. Unlike other content review books, this resource builds required content into compelling case scenarios that mimic situations in real-life practice. It features answers and rationales at the end of each chapter and includes 200 questions comprised of 150 multiple choice and 50 alternative NCLEX-RN style questions. The book is also infused with Web links and

resources that will keep students engaged and further reinforce realistic decision-making. The review focuses on developing leadership and management competencies, patient care management including advanced directives, ethical and legal issues, organizational management, and delegating responsibilities to other members of the health care team. Students love this innovative approach to learning how to think like a nurse! Faculty find the case studies useful for clinical make-up assignments. Available in both print and eBook formats, the review is enhanced by the inclusion of URLs linking to resources that expands scope of content and increases content assimilation. Key Features:

- Promotes active learning through use of unfolding case studies
- Eschews traditional repetitive question review for an intensified learning experience
- Provides answers conveniently located at the end of each chapter and rationales for both correct AND incorrect answers
- Serves as a handy resource for clinical make-up assignments
- Includes more than 200 questions including 150 multiple choice and 50 alternative NCLEX questions

Transitioning From LPN/LVN to BSN

This unique resource contains 40 psychiatric nursing case studies and questions, based on real-life client situations. Organized by difficulty level, the cases in this book and questions about each case history help to keep the focus on the client and the nursing process. Questions and answers are designed to address the need for empathy, attitude adjustment,

opened-mindedness, trust building, maintaining confidentiality, limit setting, delegating appropriately, collaborating with other professionals and making decisions. Each scenario is practical and realistic. Critical problems arising in psychiatric nursing are addressed throughout the book, including those both common and rare. The user has an opportunity to decide appropriate nursing action if encountering each of the problems presented, to reflect on whether the nursing staff in the scenario made the best decision, and to provide a rationale for his or her answer. The user can then consult the suggested answer/rationale for remediation, and find what a reasonable and prudent psychiatric nurse would do in that particular situation. Legal and ethical concerns are addressed throughout the cases, which simulate concerns arising in similar real-life situations that nurses find while practicing. Clients with psychiatric problems are encountered in a variety of settings -such as medical or community- so nurses not specializing in psychiatric nursing are represented in some of the cases.

Case Studies in Nursing Ethics

The Simulation Learning System (SLS) integrates simulation technology into your medical-surgical nursing course by providing realistic scenarios and supportive learning resources that correspond to Lewis: Medical-Surgical Nursing, 8th Edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report

and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing. STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED.

Nursing Case Studies

Now in its Third Edition, this book meets the needs of practical/vocational nurses and nursing faculty, as they work together to smooth the transition from the LPN to the RN role. The text provides interactive student exercises and strategies to "socialize" the LPN nurse/student into an RN program, taking into consideration its philosophy and curricular framework. This Third Edition includes an expanded chapter on communication and a new chapter on the NCLEX®.

The Family Nurse Practitioner

A collection of case studies for nursing students and practitioners offers 148 examples that foster creative thinking skills in medical-surgical, pediatric, maternity and psychiatric situations.

Case Studies in Psychiatric Nursing

Pain is a challenging area to understand for any

healthcare professional, and quality training on the subject is required if nurses are to provide effective pain management and person-centred care. Based on the curriculum developed by the International Association for the Study of Pain, this book offers an essential guide to managing pain. Beginning with an examination of the biology of pain, it then goes on to consider pain management across the life course, looking at key topics including acute pain, cancer pain and pharmacology. Case scenarios are included throughout the book to help readers apply the knowledge they have learned to their own practice. This book is aimed primarily at meeting the learning needs of undergraduate nurses, and is essential reading for all healthcare professionals studying pain. The text will be helpful as a basic foundation for more advanced postgraduate courses in pain management in nursing practice.

Porth: Pathophysiology 8th Ed + Bruyere: 100 Case Studies in Pathophysiology

Thinking. Doing. Caring. Connect nursing theory to clinical practice with 46 in-depth, real-world case studies. For each case study, answer questions that call on you to recall facts, understand nursing concepts, apply critical thinking, and sharpen your clinical reasoning skills in common clinical situations.

Case Studies in Patient Safety

Get much-needed exposure to real-world clinical

scenarios and psychiatric evaluations, with this invaluable guide to positive, effective psychiatric advance practice nursing care. For an expert guide to providing patient-centered, evidence-based psychiatric care, keep *Psychiatric Case Studies for Advanced Practice* by your side. Practical and easy-to-follow, these more than 50 case scenarios clearly display the complaints, diagnoses, and treatments of the most common psychiatric disorders, supporting the critical decision-making skills of nurses practicing in a broad range of settings. Psychiatric, family, emergency, and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed, holistic practice. Follow the real-life cases and expert analysis of psychiatric patients of a wide variety of ages, backgrounds, and conditions . . . Real-world child, adolescent, adult, and geriatric inpatient and outpatient psychiatric case studies that emphasize problem-based learning and an evidence-based practice Current diagnostic content from the *Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5)*, that includes DSM-5's newer diagnoses—gender dysphoria, binge eating disorder, and autism spectrum, plus current treatments for alcohol and opiate addiction Sample routine screening tools that offer convenient checklists and handouts to support patient treatment Content presented in a simple format—organized by age and indexed by diagnostic category for quick reference Each case presented in a standard format: chief complaint, history, mental status, diagnosis, differential diagnosis, treatment plan, and rationale for treatment prescribed—with questions at the end that guide you to create a diagnosis using the DSM-5

Cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings—counseling centers, correctional facilities, homeless shelters, inpatient psychiatric units, and hospital consultation and liaison services. Treatments and rationales that represent current, evidence-based research—treatment sections divided into psychopharmacology, diagnostic tests, referral, psychotherapy, and psychoeducation. Supplemental teaching tool for graduate psychiatric nurse practitioner/APN programs.

Prioritization & Clinical Judgment for NCLEX-RN

Praise for the first edition: “This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.” Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case

narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN
Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated

urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises

Case Studies in Gerontological Nursing for the Advanced Practice Nurse

Written by authors who are hospitalists and clinician-educators, *Cases in Hospital Medicine* uses practical case studies and current medical evidence to guide you expertly through the types of cases seen most often by practicing hospital-based clinicians. This engaging handbook covers the wide range of both broad and specific knowledge required in the hospital environment, while focusing on highly relevant questions and today's best practices. You'll find real-world guidance on essential topics, including commentary on research studies and clinical guidelines.\

Introduction to Maternity & Pediatric Nursing - E-Book

This essential, first-of-its-kind text for the LPN/LVN to BSN course covers every aspect of role transition to Baccalaureate Nurse and Professional Practice.

Simulation Scenarios for Nursing Education

Taylor's Handbook of Clinical Nursing Skills is a step-

by-step guide to basic and advanced nursing skills. This book will be a quick reference tool for review of cognitive and technical knowledge and will assist students and practicing nurses to provide safe and effective healthcare. It is an ideal companion to any nursing skills or nursing fundamentals text, including Lynn, Taylor's Clinical Nursing Skills and Taylor, Fundamentals of Nursing: The Art and Science of Nursing Care.

Wound Care Nursing

Immerse Yourself in the Role of a Pediatric Nurse
Develop the clinical judgment and critical thinking skills needed to excel in pediatric nursing with this innovative, case-based text. *Pediatric Nursing: A Case-Based Approach* brings the realities of practice to life and helps you master essential information on growth and development, body systems, and pharmacologic therapy as you apply your understanding to fictional scenarios based on real clinical cases throughout the pediatric nursing experience. Accompanying units leverage these patient stories to enrich your understanding of key concepts and reinforce their clinical relevance, giving you unparalleled preparation for the challenges you'll face in your nursing career. Powerfully written case-based patient scenarios instill a clinically relevant understanding of essential concepts to prepare you for clinicals. Nurse's Point of View sections in Unit 1 help you recognize the nursing considerations and challenges related to patient-based scenarios. *Unfolding Patient Stories*, written by the National League for Nursing, foster meaningful

reflection on commonly encountered clinical scenarios. Let's Compare boxes outline the differences between adult and pediatric anatomy and physiology. Growth and Development Check features alert you to age and developmental stage considerations for nursing care. The Pharmacy sections organize medications by problem for convenient reference. Whose Job is it Anyway? features reinforce the individual responsibilities of different members of the healthcare team. Analyze the Evidence boxes compare conflicting research findings to strengthen your clinical judgment capabilities. How Much Does It Hurt? boxes clarify the principles of pediatric pain relevant to specific problems. Hospital Help sections alert you to specific considerations for the hospitalization of pediatric patients. Priority Care Concepts help you confidently assess patients and prioritize care appropriately. Patient Teaching boxes guide you through effective patient and parent education approaches. Patient Safety alerts help you quickly recognize and address potential safety concerns. Interactive learning resources, including Practice & Learn Case Studies and Watch & Learn Videos, reinforce skills and challenge you to apply what you have learned. Learning Objectives and bolded Key Terms help you maximize your study time. Think Critically questions instill the clinical reasoning and analytical skills essential to safe patient-centered practice. Suggested Readings point you to further research for more information and clinical guidance.

Concepts for Nursing Practice

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Medical-Surgical, Pharmacologic, and Psychiatric Nursing provides 120 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

Pediatric Nursing

This concise essentials text, written by the authors of the popular Leadership Roles and Management Functions in Nursing, equips new nurses with invaluable leadership and management tools they need on the job. Developed for Associate Degree and LVN/LPN level nursing students, all case studies are aimed no higher than the charge nurse management level. An easy read with clear displays and tables, which emphasize core knowledge, this is an invaluable tool for the new nurse. Common stumbling

blocks, such as effective time management, are addressed clearly and simply, and students will benefit from the practiced authors' own experience and skill. Reflective Questions in each chapter encourage the nurse to examine her own values, beliefs, and actions in developing common nursing management skills. The free accompanying ancillary package for students and instructors includes NCLEX-style chapter review questions, a test generator, an ebook, and a PowerPoint presentation, along with suggestions for responding to each of the case studies and reflective questions.

Orthopedic and Sports Medicine Case Studies for Advanced Practice Nurses

As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to aging, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-

assessment or classroom use, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* is a key resource for all those dedicated to improving care for older adults.

Psychiatric Case Studies for Advanced Practice

Tap into 150 unique case studies covering all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care. The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice.

Maternal-Child Nursing Test Success

Resource added for the Nursing-Associate Degree 105431, Practical Nursing 315431, and Nursing Assistant 305431 programs.

Foundations and Adult Health Nursing

Based on a philosophy of active learning, this

innovative and refreshing study aid is designed to help students learn the fundamentals of maternal-child nursing through unfolding case studies. Nursing content is woven into vivid case vignettes that evolve over time, thus engaging students and helping them develop critical thinking and clinical decision-making skills. The text also serves as a comprehensive workbook for students preparing for the NCLEX-RN®. It is the only maternal-child nursing review text to integrate content with practice and professional responsibilities to foster an engrossing real-world learning experience. The case vignettes are based on actual cases and incorporate all core content topics (assessment, planning, intervention, and evaluation of patient care) for maternal-child nursing and NCLEX-RN® success. The book includes multiple choice, matching, true/false and calculation questions, each related to the unfolding clinical situation. Exercise answers with rationale appear at the end of each chapter. References at the end of the book facilitate self-remediation. Nurse-educators will also find this resource helpful for simulation experiences, classroom cases, group projects, and clinical conferences. Key Features: Reviews maternal-child nursing core content for course learning and test review prep, as well as for NCLEX-RN® success Uses unfolding, real-life case vignettes to integrate core content with practice and professional responsibilities Covers all types of NCLEX-style questions for greater test familiarity Incorporates online resources for use in clinical settings Develops critical thinking skills to help students "think like a nurse"

Case Studies in Medical-surgical, Pharmacologic, and Psychiatric Nursing

Med-Surg Success in the Palm of Your Hand Master the art of critical thinking and clinical reasoning with this book designed to help you develop and utilize the nursing process and prioritization in real to life case studies surrounding the most commonly seen and tested patient diagnosis. After Reading This Book You Will Improve your clinical reasoning skills Develop confidence in answering difficult Med-Surg questions Become familiar with the most common patient disorders Learn how to answer hard NCLEX(r) style questions Improve prioritization skills Master the nursing process in clinical settings Case Study Layout Client case presentation Questions regarding client background Case progression Additional critical thinking questions Rational Each case study includes 8-15 questions that require you to think beyond the most simple rational. Case studies also include highly detailed and in depth rationales (over 500 words) to insure that you are learning as much as possible about the disease process. Disease Processes Covered in this Book Congestive Heart Failure Ischemic Stroke Pneumothorax Hypertensive Crisis End Stage Renal Disease Cirrhosis Acute MI (STEMI) Hypothyroidism End Stage Renal Disease COPD Seizure Disorder Sepsis CABG Pancreatitis Respiratory Acidosis The selection process for the 15 diseases covered in this book included drawing on my experience as a CCRN in a large metropolitan ICU, speaking with other nurses in various specialties, referring to a mountain of NCLEX(r) prep books, reviewing CCRN study

materials, speaking with physicians, and reviewing NIH (National Institute of Health) data regarding the most commonly presenting conditions in hospitals. Scroll up to buy!

LPN to RN Transitions

Book has ten scenarios for both adult and pediatric clients. These scenarios can be used with any simulation device in any simulation lab. Each scenario is presented separately for the LPN/LVN student and the RN student and includes goals and outcomes, and patient information.

Clinical Case Studies in Home Health Care

Part of the popular LPN Threads series, Introduction to Maternity & Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX® test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for

achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness -- including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions and answer guidelines for critical thinking questions, an English/Spanish audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination.

LPN to RN Transitions

Quite simply, Clinical Decision Making shortens the distance between theory and nursing practice like no other educational tool."--BOOK JACKET.

Clinical Cases: Medical-surgical nursing case studies

This text provides a holistic view of caring for patients with wounds, and a critical approach to the management of wounds in both hospital and community settings. The life-cycle approach reflects the context of wound theory and case studies enable student

Case Studies in Pharmacology

Rev. ed. of: Case studies in nursing ethics / Robert M. Veach, Sara T. Fry. 1987.

Winningham and Preusser's Critical Thinking Cases in Nursing

The Family Nurse Practitioner provides essential guidance and information for understanding how to diagnose and manage typical (and some atypical) patient cases. With contributions from noted experts on the topic, this new edition contains updated cases to reflect today's patient-centered approach, and includes the most recent advances in patient care. From neonatal to geriatric, all the cases demonstrate real-life scenarios and present appropriate solutions on a case-by-case basis to reflect the nuance required in practice. The revised edition emphasizes pharmacological management, with a new section on mental health care and additional cases on chronic conditions. Greater consideration is given to race, gender, ethnicity and their impact on management options. Contains more than 70 case studies Offers new cases on pelvic pain, substance abuse, food allergies, celiac disease, child abuse, pre-conception planning, and dermatology Includes discussion questions to help develop understanding Written for students and academics of nursing and nurse practitioners, The Family Nurse Practitioner is the ideal text for developing and expanding one's knowledge and comprehension of the diagnosis and management of patient care.

Taylor's Handbook of Clinical Nursing Skills

Take notes for critical thinking and clinical reasoning in every course, class, and clinical. Focus on prioritization in every subject to include fundamentals, medical surgical, mental health, pediatrics, and even community health. Nursing students will be able to focus on the nursing process every step of the way while ensuring that they are very comfortable with QSEN (quality and safety) and NCLEX competencies and standards.
