Encyclopaedia of International Aviation Law

Improving the Continued Airworthiness of Civil Aircraft

The four volumes of the Encyclopaedia of International Aviation Law are intended for students, lawyers, judges, scholars and readers of all backgrounds with an interest in Aviation Law; and to provide the definitive corpus of relevant national and regional legislation, including global aviation treaties and legislation to enable all readers without exception, to develop the background, knowledge and tools to

understand local, regional and international Aviation Law in contextual fashion. The first volume has a detailed text of country legislation, including national cases and materials whilst the second, third and fourth volumes focus on International Aviation Law Treaties, international cases and materials and Aircraft Refueling Indemnity (TAR BOX) Agreements.

Air Line Pilot

On October 14, 2004, about 2215:06 central daylight time, Pinnacle Airlines flight 3701 (doing business as Northwest AirlinK), a Bombardier CL-600-2B19, N8396A, crashed into a residential area about 2.5 miles south of Jefferson City Memorial Airport, Jefferson City, Missouri. The airplane was on a repositioning flight from Little Rock National Airport, Little Rock, Arkansas, to Minneapolis-St. Paul International Airport, Minneapolis, Minnesota. During the flight, both engines flamed out after a pilot-induced aerodynamic stall and were unable to be restarted. The captain and the first officer were killed, and the airplane was destroyed. No one on the ground was injured. The flight was operating under the provisions of 14 Code of Federal Regulations Part 91 on an instrument flight rules flight plan. Visual meteorological conditions prevailed at the time of the accident. The National Transportation Safety Board determines that the probable causes of this accident were (1) the pilots' unprofessional behavior, deviation from standard operating procedures, and poor airmanship, which resulted in an in-flight emergency from which they were unable to recover, in part because of the pilots' inadequate training; (2) the pilots' failure to prepare for an emergency landing in a timely manner, including communicating with air traffic controllers immediately after the emergency about the loss of both engines and the availability of landing sites; and (3) the pilots' improper management of the double engine failure checklist, which allowed the engine cores to stop rotating and resulted in the core lock engine condition. Contributing to this accident were (1) the core lock engine condition, which prevented at least one engine from being restarted, and (2) the airplane flight manuals that did not communicate to pilots the importance of maintaining a minimum airspeed to keep the engine cores rotating.

Ever wondered how many aircraft were converted into Japanese Zeroes and torpedo bombers for Tora! Tora! Tora! or how French Gazelle helicopters were modified for the title role in Blue Thunder? This first of its kind reference book lists aircraft featured in 350 films and television shows, providing brief individual histories, film locations, serial numbers and registrations. Aircraft are also cross-referenced by manufacturer. Appendices provide brief bios on pilots and technicians, information on aircraft collections owned by Tallmantz Aviation and Blue Max Aviation and film credits for U.S. aircraft carriers.

Aircraft Accident Report

The terrifying sequel to Day by Day Armageddon—for fans of The Walking Dead. "J.L. Bourne is the new king of hardcore zombie action!" (Brad Thor) Armies of undead have risen up across the U.S. and around the globe; there is no safe haven from the diseased corpses hungering for human flesh. But in the heat of a Texas wasteland, a small band of survivors attempt to counter the millions closing in around them. Survivor, Day by day, the handwritten journal entries of one man caught in a worldwide cataclysm capture the desperation—and the will to survive—as he joins forces with a handful of refugees to battle soulless enemies both human and inhuman from inside an abandoned strategic missile facility. But in the world of the undead, is mere survival enough?
