In social science and politics, power is the capacity of an individual to influence the actions, beliefs, or conduct (behaviour) of others. The term authority is often used for power that is perceived as legitimate by the social structure, not to be confused with Authoritarianism. Power can be seen as evil or unjust; however, power can also be seen as good and as something inherited or given

The current literature focuses largely on the post-9/11 era, seeking to establish how the discourse of the 'War on Terror' allows governments to institute exceptional measures giving them greater control over the citizenry as a whole. This power, it is argued, is the hidden mechanism of current politics.

The latter has been described as a misleading and victim-blaming discourse, which ignores underlying structural determinants (Drury, Reicher, & Stott, 2020). This brings us back to the ethnographic introduction of this essay. Despite a strong motivation to help others, I distanced myself from governmental telepsychology.
