Alfred Marshall, Principles of Economics (1890) – Founder of Modern (Neo-classical) Economics. His book Principles of Economics was the dominant textbook in economics for a long time and it is considered to be his seminal work.

## **The Rise of Christianity**

This "fresh, blunt, and highly persuasive account of how the West was won—for Jesus" (Newsweek) is now available in paperback. Stark's provocative report challenges conventional wisdom and finds that Christianity's astounding dominance of the Western world arose from its offer of a better, more secure way of life. "Compelling reading" (Library Journal) that is sure to "generate spirited argument" (Publishers Weekly), this account of Christianity's remarkable growth within the Roman Empire is the subject of much fanfare. "Anyone who has puzzled over Christianity's rise to dominance must read it." says Yale University's Wayne A. Meeks, for The Rise of Christianity makes a compelling case for startling conclusions. Combining his expertise in social science with historical evidence, and his insight into contemporary religion's appeal, Stark finds that early Christianity attracted the privileged rather than the poor, that most early converts were women or marginalized Jews—and ultimately "that Christianity was a success

because it proved those who joined it with a more appealing, more assuring, happier, and perhaps longer life" (Andrew M. Greeley, University of Chicago).

Our elementary, middle, and high school teaching about Jews, Judaism, and Israel is driven by textbook misstatements about Jewish theology, social structure, and the history of Israel that comprise an unsavory picture of Jews and Israel. This book will be an extremely valuable reference tool for educators and members of the public interested in religion and the Middle East.

## **World History Medieval and Early Modern Times**

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

During World War II a community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors.

### **Holt Mcdougal Biology**

Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.
