In today's world taking an insurance is become a necessary requirement for cars and all types of vehicles we use in everyday life. We need to know before taking the insurance what problems will come later when we go for a claim. While taking insurance is hassle free and easy, when it comes to getting claims we face a lot of hurdles which we need to be aware while taking the insurance. Also, after we have taken such insurances for our cars/vehicles we also need to know about the problems we are facing in getting the insurance claim for our vehicle. Also, one needs to check the safety features the car provides. Accidents occur mainly because of weak lights and front glass getting foggy resulting in poor visibility..

A dramatic biography of the extraordinary Spanish industrialist and entrepreneur Eduardo Barreiros Born in an impoverished region of Galicia, possessed of little education and less money, Eduardo Barreiros (1919-1992) rose to become an

immensely successful entrepreneur and one of Spain's most prominent industrialists. In this engaging biography, the first on a Spanish entrepreneur in English, Hugh Thomas recounts Barreiros's origins as an auto mechanic, his success in the motor industry, his tragic alliance with the Chrysler Corporation, and his little-known role as a motor industry founder in 1980s Cuba. Drawing on an unrivaled knowledge of Spanish history, Lord Thomas also brings to light Barreiros's critical role in the modernization of the Spanish economy in the post-Civil War years. The book offers a detailed portrait of Don Eduardo's personality, character, and numerous entrepreneurial endeavors, as well as a full account of the difficulties the Franco-era government threw in the path of his capitalist activities. The relationship between Barreiros and the Chrysler Corporation is also described, along with the failed Dodge Dart project that ultimately cost Barreiros his business. Finally, the book recounts Don Eduardo's late-in-life efforts to help establish a motor industry in Castro's Cuba--a paradoxical conclusion for a great capitalist.
